github.com/shriyatallapragada

Third-year CSE student who builds LLM-powered tools that turn manual, document-heavy workflows into structured, explainable results, from résumé-to-role matching to onboarding and task agents. Comfortable turning ambiguous problems into clear requirements, presenting to non-technical audiences and running models locally to keep data on-device.

## AI & AUTOMATION PROJECTS

**Indian News Comparator · Chrome extension** GitHub

Python · FastAPI · PyTorch · ChromaDB · Groq · Docker

- Trained an IndicBERT + Liquid Neural Network bias classifier on 2,594 labeled articles (65.4% accuracy on 3 classes vs 33% baseline), scoring articles from −5 to +5.
- Built the full system: training pipeline, FastAPI backend, Chrome extension and Docker deployment, with topic-filtered retrieval and an LLM explanation for every score.

**NeuralPath · AI onboarding platform** IISc Hackathon

Python · FastAPI · LangChain · Ollama (Llama 3.2) · Next.js

- Built the FastAPI backend and AI pipeline that parses a résumé (PDF), compares it against a job description and flags skill gaps.
- Generated personalised learning roadmaps with Llama 3.2 run locally, keeping candidate data on-device; mapped skills to the O*NET taxonomy.

**SprintMind · Scrum task & retention agent** Microsoft HackwithHyderabad 3.0

Python · Hindsight agent memory · LLM agents

- Built a scrum task agent that retains team context across sprints, using Hindsight agent memory.

## LEADERSHIP & EXPERIENCE

**E-Cell, JNTUH** Aug 2025 – Present

- **Head of Design** (Aug 2025 – Present): lead the design team in a 30-member E-Cell and own brand identity for university-wide startup events, using Affinity Suite and Canva.
- **Head of Social Media** (Aug 2025 – Feb 2026): ran social campaigns that grew student participation in flagship summits.

**Design Lead · Eraya (club fest)**

- Led design for the whole fest (3,000+ attendees from multiple colleges), coordinating a large multi-team group.

**Volunteer · JNTUH UCESTH** Cultural, Technical & Alumni Relations

- Coordinated the Global Alumni Meet and on-ground logistics for fests with 1,000+ attendees.

## HACKATHONS & COMPETITIONS

**Microsoft · HackwithHyderabad 3.0:** SprintMind, AI scrum task agent

**IISc Hackathon:** NeuralPath, AI onboarding platform

- **Smart India Hackathon 2026:** team lead and presenter for TraceNet (main entry) and the backup idea QuantaDx (hybrid quantum-AI disease detection).
- **Emerge 2.0, IIT Hyderabad** (entrepreneurship competition): quarter-finalist.
- **Amazon ML Challenge 2026** (72 hrs, team of 4): entity-resolution pipeline with LightGBM over millions of business records.
- **TCS Hackathon (AI track):** RetailVerse AI, a retail decision twin where an AI copilot's promotion edits are checked against inventory, margin and budget, simulated, and applied only after human approval. Built the frontend and trained the model on a Kaggle dataset.

## EDUCATION

**B.Tech, Computer Science & Engineering (Regular)**
University College of Engineering, Science & Technology Hyderabad (UCESTH), Jawaharlal Nehru Technological University Hyderabad (JNTUH)

Currently in 3rd year · Expected 2028

**CGPA 9.295**
SGPA: 9.15 · 9.65 · 8.98 · 9.40

**Class XII** · Narayana Jr. College
96.2% (2024) · JEE Main 98.7 percentile

**Class X** · D.A.V. Public School
96.17% (2022)

## SKILLS

**AI & Data**
Prompt design, LLM apps, semantic search (ChromaDB), LangChain, Ollama, Groq, PyTorch, Hugging Face, LightGBM, Excel

**Build**
Python, Java, SQL (Oracle), JavaScript, C, FastAPI, React, Docker, Git & GitHub

**Design**
Canva, Affinity Designer / Photo / Publisher, visual branding

**Working style**
Technical documentation, requirements, presenting & pitching, debating, team leadership

## WORKSHOPS

- Agentic AI
- AI fundamentals
- AI & Data Science Intensive (2024): ML basics and data visualization
